Multimedia- & Software-Producers, E-Publishers, Companies

All-In-One Protector protects **important documents, conference materials, e-learning software, applications (EXE files), company presentations, etc.**, against being copied and tampered with.

Companies, for example, can safeguard conference materials against misuse, information designed for the sales force against disclosure and course / workshop contents against data theft. Additional programs like Flash-Player, Video Player, PowerPoint or PDF Reader are not re-

The screenshot shows the 'Licences' configuration window in the software. It includes sections for 'Type of license per' (User, Concurrent User), 'Evaluation Time' (Number of days to evaluate, Number of minutes for evaluation, Expiry Date), 'License Options' (Time limited version after Activation), and 'Security Options' (Prevent screenshots, Check for system date modification, Don't allow to run on Virtual Machine, Check if USB-Stick was removed).

quired – all required components are contained in the **All-In-One Player**.

The protection is applied by encrypting and storing all files of a project, e.g. a flash application with images, video, audio and other files, in one sole database. The original file formats cannot be accessed by unauthorized users.

All-In-One Protector is supplied along with its own All-In-One Player which **does not require an installation or administration rights** on the customer's PC. All types of media, like CDs, DVDs, Downloads or USB flash drives, are supported.

Evaluation versions are

The screenshot shows the 'PDF' configuration window. It includes sections for 'PDF Build Options' (Save each PDF file as one single encrypted file), 'Security Options' (Allow Printing, Don't allow printing to PDF/File, Allow Select and Copy, Do NOT encrypt PDF files, Limit number of print copies), 'Show Toolbar' (Menu bar, Rotate View, Zoom, Find), 'Show Panes' (Page Layout, Page Navigation, Bookmarks, Display Bookmarks on open, Thumbnails, Display Thumbnails on open, Search Pane), and 'Runtime Options' (Extract all Files).

The **Enterprise Edition** allows to run an **own Activation Server** and provides USB flash drive mass duplication.
